

# Profiles

Timber Products offers a full line of standard architectural trim and moulding patterns. However, when the job requires for custom moulding, shaping, ripping, re-sawing or surfacing we can provide the product and service. We grind our own knives and can produce and profiles up to 11 3/4" wide. We at Timber Products can fill your wood needs and deliver the product to your local distributor.

## Check out some of the more common knife faces available
